Hello,

Thank you for your email. It has to be clear, at all time and not matter the platform or communication support, that you are not Odoo S.A or acting on its behalf. The logo and trademark can only be used to describe the product (mentioning any changes that Websoft9 Inc. has implemented and that it's not the Enterprise version) or the fact that it was initially developed by Odoo S.A. but nothing else. Please be very clear in the way you promote the product, the customer should not wonder if they're dealing with Odoo S.A. or not, with our own product or not.

I hope this clarifies the situation. Should you have questions, please let me know.

Kind regards,

--
