Hi Evelyn,
first of all I would like to say that we have many different ways to become our partner. Since you are using Knowage, why not discussing some scenarios in this sense?
Moreover, if you have installed KNW without any modification, including hiding our brand, it is allowed.
However, it really depends on what exactly you have installed.
For instance, there might be some problems if you have installed iCharts!

Looking forward to hearing from you.
Very best regards,

--

Oggetto: Request permission to Use Knowage Word Mark

Hi Noemi,

Sorry to bother you again. I've sent an email to give some clarity on 26, Aug. It is attached below. If you have any questions about that, feel free to contact me. I would be glad to clear your doubt.

Additionally, I'm reaching out to request permission to use Knowage word mark.
Mainly, we provide Knowage Community Edition package, which contains software stack Knowage uses, such as nginx, MySQL. It's not as much as an integration, just providing what is needed to run Knowage. The sure thing is that we don't modified the software included. We publish this ready-to-use package on platforms, like [AWS](#).
We use word mark Knowage to describe the package, as shown on the following picture. This is only for nominative use to refer to the unmodified software. To prevent confusion amongst people as to which is the "official" one, we make statement about the ownership, so that people might not confuse it for an official project.

Knowage Community Edition (Ubuntu)

Version Knowage-CE 7.1.5 (Ubuntu18.04) | Sold by [Websoft9](#)

Starting from \$0.06/hr or from \$482.00/yr (0% savings) for software + AWS usage fees

Intellectual Property Statement:

The stack of this offer includes a wide range copies of open source and free software, but the Copyrights, Patents and Trademarks are legal protections for original owner.

Take Knowage as an example:

- Knowage suite and the related Website belongs to Engineering Ingegneria Informatica S.p.A.
- Knowage-Server is licensed under the GNU Affero General Public License v3.0.

I'd appreciate it if you could give clear reply about whether it's permissible to use it or we need request permission to use it.

Best regards,
Evelyn
