	Hi Mark,  Thanks for your reply. We have viewed the Apache License, version 2, and Apache trademark policy. As it can you to know whether it is permissible to do that.
	<ol> <li>We make integration solutions based on Apache software and offer the integration as an open source project.</li> <li>The integration is a software package including related software required to complete certain work. For example, modifications to the included software, we arrange it in a unified operating environment to form an integration a solutions.</li> </ol>
	2)We publish the integration on platforms, like AWS and distribute Apache software as part of distribution for it. We deliver the integration to users as image. Image contains operating system and pre-configured software. It than running script. It is sure thing that we don't offer hosting service. Users subscribe the integration solution charge fees for integrating and offering automatic deployment service.
	3)We use "Apache Software Name" to describe the integration, as shown on the following picture. To avoid co
