Hello Evelyn,

Sorry for the late reply.

We have attentively reviewed the provided materials. You are right, CloudBeaver Community is distributed with Apache 2.0 license. You can use CloudBeaver in your images and sell them but you have to keep clear and understandable information about the intellectual property rights owners and contributors. It is related to the source code and product name/logo. It means that you can pack the CloudBeaver to your preconfigured images and add your own name for this package. But you need to mention that this package is based on the original product and provide the link to the source code repository. Moreover, you can not use names like CloudBeaver Cloud Installer because it confuses the end-users about the real nature and developers of the product. CloudBeaver cannot be a part of the product name, but you can use it in the product description as it described above.

Please let me know if you have any questions.

Best regards,

Tatiana Krupenya
DBeaver product manager

> Hi Tatiana,
>
> I am very glad to contact you on behalf of our company. Websoft9 focuses on automatic installation and deployment of cloud application software. We package high-quality open source software with runtime into image without any change to source code, release source code for image on Github, and then distribute it on Major Cloud, so as to provide one-click use for global users.
>

Hello Evelyn,

Thank you for your request. How are you going to use the CloudBeaver Community Edition trademark?

Thank you,

Tatiana Krupenya
CloudBeaver product manager

From: Evelyn.zhu <evelyn.zhu@websoft9.com>
Subject: About the trademark use consultation of CloudBeaver Community Edition

Message Body:
Hello, I'm the legal affairs officer of websoft9. We would like to ask you about the use of the cloudbeaver Community Edition trademark. The inquiry letter has been sent to your email a few days ago. I look forward to your reply. Thank you.
